**RECORD FORMAT:**

The Origin-Destination Survey reports must be created as an electronic “comma separated values” file, using ASCII text character encoding, for uploading via the “eSubmit” application.

The comma separated values file **MUST BE** indicated when naming the file with file extension [CSV] or [csv] following the file name.

The file name is flexible and may be determined by the individual air carrier, but the comma separated values (csv) file format is required, as outlined in the rule entitled, *Submitting Airline Data via the Internet*.

The fields in the sample record shown below follow the same order as the above record description, separated by commas, and saved with the file name extension of .csv.

Suggested file name: XX201003-OND.csv

**Sample Record Format:**

```
XX, 2009, 1, 4913, 1, BOS, IO, XX, G, LAX, VA, VA, G, SYD, --, --  
, , CNS, DJ, VA, G, BNE, VA, VA, G, LAX, IO, IO, G, BOS, .....  
.....
```

**NOTE:**

The itinerary in the sample record format above indicates a surface segment between SYD and CNS. The, --, --, , indicate the positions the two carriers and fare code would have occupied had there been air transportation between the two airports.
